Melissa,

Here is the information I mentioned that is on the web site that is not accurate.

On the web site, under the Public Health Section of the 8-10 update, there is the following paragraph:

The Agency for Toxic Substances and Disease Registry (ATSDR) recommends that additional monitoring should be conducted until the river returns to pre-release levels. If local health care providers have questions they can contact the ATSDR Regional Office at 303-312-7013. ATSDR's Regional Office can arrange a consultation between the health care provider and ATSDR physician.

The ATSDR regional representative is in the field and not getting calls at his desk number that is listed on the web site. The following suggested edit provides more the accurate

information.

The Agency for Toxic Substances and Disease Registry (ATSDR) recommends that additional monitoring should be conducted until the river returns to pre-release levels. The San Juan Basin Health Department is working with the Rocky Mountain Poison Control and Drug Center (RMPDC). Public or health care providers that have questions should direct their calls to the RMPDC at 1-800-222-1222.

Lisa Lloyd
